[linkedin.com/in/grestamanaufaltsabit](https://www.linkedin.com/in/grestamanaufaltsabit)

Data Science undergraduate at Telkom University (GPA: 3.67/4.00) with strong interests in data analytics, machine learning, and AI-driven solutions. Experienced in developing data-driven projects, including predictive modeling, computer vision applications, and OCR-based automation systems using Python, SQL, and machine learning techniques. Served as a Database Modeling Teaching Assistant, mentoring more than 100 students in database design and MySQL implementation. Recognized as Runner-Up in the ADIKARA 2025 Big Data Analytics Competition among 250+ participants. Passionate about transforming complex data into actionable insights and building impactful technology solutions.

Work Experiences

SMPIT Bunayya - Tangerang, Indonesia

(Apr 2024 – Aug 2024)

Mentor / Teaching Assistant

- Delivered structured lessons to junior high students, improving learning outcomes and classroom engagement.
- Designed and implemented learning materials aligned with the national curriculum and student needs.
- Assessed student progress through quizzes, assignments, and direct feedback to support academic growth.
- Collaborated with teachers to manage classroom activities and support individualized learning.

Education Level

SMAQ Insan Pratama 2 - Tangerang, Indonesia

(2021 – 2024)

Senior High School Student

- Relevant Studies: mathematics, science, basic programming, problem solving, basic language.

Universitas Telkom – Jawa Barat, Indonesia

(Sep 2023 – Present)

Bachelor of Data Science (Undergraduate, Semester 3)

- Current GPA: 3.67/4.00.
- Relevant Studies: simulation and optimization, database relational, data visualization, data analysis, time series analysis.

Organizational Experience

Telkom University – HIMA Data Science

(Oct 2025)

Communication & Information Department (Kominfo) – Visual Design Division

- Responsible for publication and visual design support for organizational events
- Created visual design assets for various event series and organizational needs

Telkom University – PRADA (Pejuang Ramadhan dan Idul Adha) 1446H

(Mar 2025)

Head of the Worship Division

- Coordinated division members to carry out duties effectively and responsibly.
- Managed and scheduled imams for Tarawih prayers and other worship activities.
- Oversaw the implementation of religious programs and ensured smooth execution.
- Acted as the main coordinator for worship-related activities during events.

Instagram Team

- Managed daily content posting and scheduling on Instagram.
- Created captions and visual concepts aligned with forum branding.
- Monitored engagement and responded to comments and messages.
- Coordinated with the publication team to ensure consistent messaging.

Project Implementation

Coronary Artery Disease Classification

Developed a machine learning model to classify the presence of Coronary Artery Disease (CAD) based on patient health attributes, with additional analysis on feature importance and data patterns.

- Performed data preprocessing, handling missing values, and feature encoding
- Applied and compared multiple machine learning algorithms including Random Forest, Decision Tree, Naive Bayes, and K-Means clustering
- Conducted exploratory data analysis to identify key factors influencing disease prediction
- Evaluated model performance using classification metrics

Tools: **Python, Pandas, Scikit-Learn, NumPy, Matplotlib**

Dental Disease Detection using YOLOv8

Built a computer vision system to detect and classify dental conditions into multiple categories for automated dental health analysis.

- Trained YOLOv8 model for object detection on dental image dataset
- Classified conditions including Gingivitis, Hypodontia, Caries, and Calculus
- Integrated model into a simple web application for inference using Streamlit
- Containerized application using Docker for deployment readiness

Tools: **Python, YOLOv8, Streamlit, Docker, Git**

Quran Mood Recommendation System

Developed a recommendation-based application that suggests relevant Quranic verses based on user emotional input.

- Designed a text-based recommendation system using NLP-inspired logic
- Implemented keyword-based classification to map user input to relevant themes
- Built interactive web interface for real-time user interaction

Tools: **Python, Streamlit, Scikit-Learn**

OCR-Based Smart Parking System

Designed an automated parking system that detects vehicle license plates and stores entry data for parking management automation.

- Implemented OCR pipeline using EasyOCR for license plate recognition
- Stored extracted data into SQLite database for structured record management
- Enabled automated timestamping and billing calculation logic
- Built interactive interface for system monitoring

Tools: **Python, EasyOCR, SQLite, Streamlit, datetime**

Technical Skills

- Programming Languages: Python, SQL
- Database Management: MySQL, SQLite
- Data Analysis: Pandas, NumPy, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA)
- Data Visualization: Matplotlib, Seaborn, Tableau, Microsoft Excel
- Machine Learning: Scikit-Learn, K-Means Clustering, Random Forest, Decision Tree, Naive Bayes
- Computer Vision: YOLOv8, EasyOCR
- Development & Deployment: Streamlit, Docker, Git, GitHub
- Database Design: Entity Relationship Diagram (ERD), Relational Schema Modeling, Database Normalization

Achievements

- Runner-Up ADIKARA 2025 – Big Data Analytics (250+ participants)
- Teaching Assistant for 100+ students (Database Modeling)
- Completed MBC Lab – DigiLearn Study Group (Big Data track), gaining foundational experience in data processing, analytics concepts, and applied big data workflows

Volunteer Experiences

- **Speaker – Campus Expo, SMAQ Insan Pratama (2025)**
Delivered academic and motivational sessions to prospective students, supporting career awareness and campus preparation programs.
- **Speaker – Ramadhan Tarawih Program, PRADA 1446H (2025)**
Delivered educational and religious talks during community Ramadan activities to enhance engagement and understanding among participants.
- **Photographer – Social Service Events 1 & 2, TemanKita (Bandung)**
Documented community outreach activities through event photography to support publication, documentation, and social media storytelling.
- **Community Member – Social Impact Programs**
Actively participated in community-based social initiatives focused on education support and social engagement activities.
